

Health Informatics, Information Management and Administration

School of Allied Health Professions

M.S. Health Informatics (online or on-campus)

The healthcare industry dynamics are creating an information-intensive environment that professionals must navigate as they deliver healthcare to patients. Clinical and non-clinical professionals in this industry will be required to be knowledgeable and proficient in developing and using technology, data and information. Effectively and efficiently managing the valuable asset of information will predicate healthcare organizations' future success or failure. This curriculum blends the topics of leadership, system theory and management, technology, data management, data analytics, cybersecurity, and regulatory constraints to prepare graduates for critical leadership roles in healthcare organizations. As informatics leaders, graduates will assist in developing and administering information systems and harnessing data in healthcare to positively influence patient care at an individual, local and national level.

Prospective students would come from various education backgrounds, including, but not limited to, health information management, nursing, radiology, patient financial services, health care government agencies, clinical and administrative decision support, computing services, and pharmacy.

JOB OPPORTUNITIES

As the healthcare industry develops, under vastly expanding regulatory mandates, there is a need for information systems to meet the needs of all stakeholders, and the need to educate health informatics professionals will steadily increase. The American Medical Informatics Association (AMIA) boasts over 4000 members dedicated to advancing the health care industry through the deployment and diffusion of technology into the health care process. AMIA projects a need for more than 50,000 new health IT workers in the next five to seven years (<http://www.amia.org>). Additionally, the Bureau of Labor Statistics expects the job outlook for Health Service Managers to increase at a rate of 20% between 2016-2026.

Employment opportunities upon completion would include a variety of challenging prospects, including, hospitals, clinics, health information exchanges, elevated managerial roles, system development, application specialist, project management, electronic health record system specialists, clinical decision support, database administrators, clinical documentation specialists, and consultants.

PROGRAM MISSION

Our purpose is to prepare our graduates to be competent health informatics professionals through excellence in instruction, project execution, advisement, and mentoring with an emphasis on global service.

- Educating competent health informatics professionals.
- Promoting the health informatics profession.
- Extending the current knowledge of health informatics professionals at neighboring healthcare facilities.
- Challenging students and department faculty to maintain high standards of ethical and professional behavior.
- Encouraging students and faculty to seek a meaningful relationship with God and a balanced Christian lifestyle

PROGRAM LEARNING OUTCOMES

Upon completion of the program, students will be able to demonstrate the ability to:

- Conduct information system analysis, design, implementation and management.
- Evaluate data structure, function and transfer of information, socio-technical aspects of health computing, and human-computer interaction.
- Recommend information technology, including but not limited to, computer networks, databases and system administration, security and programming.
- Develop effective verbal and written communications
- Ensure successful project management
- Assess quality and performance issues in healthcare using data analytics and performance improvement tools

ADMISSIONS REQUIREMENTS

1. Provide evidence of completion of a bachelor's degree from an accredited U.S. college or university or the foreign equivalent of a bachelor's degree.
2. Provide three letters of recommendation that indicating strong academic background and professional readiness.
3. Interview, if deemed necessary.
4. Complete the LLU application, including personal statement, and submit application fee by August 1 for consideration to begin in the Fall.
5. 3.0 GPA or higher. The Graduate Record Exam (GRE) may be requested for GPAs below a 3.0.

International Students & Scholars: This program qualifies for certain visas. Please call Esther Guerpo at 909-558-4955 or visit the following website to locate requirements related to English Proficiency exams, Transcript Evaluations, and Visas: <https://home.llu.edu/education/how-apply/international-students-scholars>

TUITION COSTS

Tuition and fees are generally updated before Summer Quarter. Actual tuition is subject to minor fluctuations from year to year. For information on financial aid, please visit the Financial Aid's website at: <http://www.llu.edu/students/financial-aid>.

48 TOTAL UNITS x \$710 per unit = \$34,080	
On Campus	Online
+Enrollment Fees: \$905/quarter	+Enrollment Fees: \$0/quarter
Total Cost: \$39,078	Total Cost: \$34,080
Average Cost per quarter: \$6,513	Average Cost per quarter: \$5,680

PROGRAM OUTLINE

The courses for the entire Master's of Science degree in Health Informatics program is outlined below for full-time students. *Note for on-campus applicants: Cohorts that do not meet the minimum enrollment of four students will be transitioned to the exclusively online modality.

Fall - Year 1	Winter - Year 1	Spring - Year 1
HLIF 510 Health-Care Information Systems (4) HLIF 515 The U.S. Health-Care System (4)	HLIF 548 Human Computer Interactions (2)* HLIF 565 Technical Structures in Health Informatics (3) AHRM 514 Biostatistics (3)	HLIF 525 Management of Data & Information (2) HLIF 545 System Design, Implementation and Management (3)* AHCJ 555 Writing for the Healthcare Professionals (3)
Unit Total: 8	Unit Total: 8	Unit Total: 8
Fall - Year 2	Winter - Year 2	Spring - Year 2
HLIF 526 Quality and Performance Improvement (2)* HLIF 530 Data Analytics and Decision Support (3) REL 5 Religion Course (3)	HLIF 520 Data Management: Modeling and Development (3) HLIF 550 Systems Security in Health Care (2) HLIF 555 Healthcare Vendor and Project Management (3)	HLIF 540 Leadership Perspectives and Practice (4) HLIF 570 Professional Portfolio (2) CHOOSE: HLIF 575 Capstone: Project and Special Topics in Health Informatics* -OR- HLIF 584 Professional Practicum & Seminar (2)
Unit Total: 8	Unit Total: 8	Unit Total: 8
		Program Total: 48

*Designates a course only offered in the online modality; on-campus students will take this course in the online modality.
