

Occupational Therapy

School of Allied Health Professions

Transforming lives through occupation, service, and whole-person care

PROGRAMS OFFERED

♦ Masters of Occupational Therapy (MOT) Bridge

Occupational therapy professionals work to enable engagement in daily meaningful activities or occupations to promote physical, psychological, and spiritual health and well-being. Occupational therapy assessments and interventions aim to empower individuals to live independent, productive, and satisfying lives despite disease, injury, mental illness, developmental disabilities, or other limitations.

Occupational Therapy Professional Work

Occupational therapists work with clients across the lifespan from newborn infants to the elderly. Intervention strategies include creatively using therapeutic activities to address clients' diverse needs in the following realms: motor, sensory, cognitive, visual, perceptual, emotional, and social. Occupational therapy also provides skilled training in the use of adaptive equipment and assistive technology as well as recommendations for environmental design and modification.

One of the benefits of a career in occupational therapy is the variety of settings available for employment including schools, hospitals, mental health centers, home health agencies, nursing homes, ergonomic and corporate settings, private practices, prevention programs, and community settings such as domestic violence and homeless shelters.

Employment Trends

Occupational therapy is a vital and growing profession. U.S. News and World Report states that occupational therapy remains a high-growth field, with 25% more jobs predicted in the new decade. Earnings vary by setting, experience, and position. Occupational therapists' national average annual income is \$96,000.

Department of Occupational Therapy

Within the Department of Occupational Therapy, faculty members play an active role in the education of students as evidenced by small class sizes with frequent one-on-one interaction. Faculty members mentor students throughout the program to prepare them for the National Board Certification examination and future employment.

The department also offers its students a rich learning environment for developing professional skills with an emphasis on occupation-based practice, whole-person care, health management, and wellness; Evidence-based practice, mission-focused community engagement, and professional citizenship.

The MOT program is primarily a hybrid program where students use the University's Learning Management System, Canvas, to supplement the hybrid learning experience. The distance education (DE) classes offered online through Canvas incorporate best practices in DE, such as having substantial interaction between faculty and students, and also active learning opportunities. The University has a Canvas tutorial in the student's application registration portal with instructions on how to use the Learning Management System. Four on-campus lab intensives for hands-on learning are scheduled over the length of the program.

Accreditation Status

The occupational therapy master's degree program has been granted Accreditation by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD 20814. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its Web address is www.acoteonline.org.

Students must complete 24 weeks of Level II fieldwork within 6 months following the completion of the didactic portion of the program. Level II fieldwork must start after completion of didactic activities.

After successful completion of the NBCOT exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.
