

PROGRAM OFFERED

- ◆ PhD

Program Objective

To prepare leaders in the profession of physical therapy who are capable of conducting research that will improve the lives of people through whole person care, to serve as client/patient advocates, and to serve as educators in entry-level and graduate physical therapy programs.

Program Description

Designed for the working professional, the Doctor of Philosophy (PhD) in Physical Therapy (PT) synergizes with the University's Motto, "To Make Man Whole". Physical Therapists who are currently treating or teaching will benefit from a modern, evidence-based curriculum aimed at caring for the whole person. Face to face classes, a mere two evenings a week, facilitate the balance of work and study for our students. Aligned closely with our core values, this program provides physical therapy graduates with the skills and experience that are necessary to pursue careers as researchers and educators.

As part of the School of Allied Health Professions (SAHP), Department of Physical Therapy, the PhD program begins with a distinctive core of classes. These fundamental courses align with the American Physical Therapy Association's movement science agenda as well as with LLU's Mission, "To continue the healing ministry of Jesus Christ".

The Core Curriculum includes (18 units):

1. Psychoneuroimmunology I (Mind/Body Connections)
2. Bioenergetics (Cardiopulmonary/Endocrine Systems)
3. Biomechanics (Musculoskeletal System)
4. Biocontrol (Nervous System)
5. Grant Writing
6. Clinical Translation of Pain Science

In addition to the Core Curriculum, five other domains enhance the student's comprehensive knowledge in the areas of:

1. Clinical & Applied Science
2. Lifestyle Health & Wellness
3. Education, Administration & Leadership
4. Religion
5. Research & Statistics

This curriculum is uniquely and individually designed to meet the student's interests, background and desired area of research. This is accomplished through collaboration with the program director and the dissertation chair who work carefully with the student to create an interesting, challenging and applicable direction of study that will facilitate acquisition of the skills needed to produce exceptional research. Because this is a research-oriented doctorate degree, the PhD student will then select a research guidance committee consisting of 3-4 content experts to facilitate student-driven, faculty-supported research that is ready for publication by the end of the program.

As a faith-based institution, our program thoughtfully integrates religion and spirituality into our approach to wholeness. The three religion courses are directed towards ethical, theological and religious studies and are designed to complement the greater understanding of spirituality and religion and especially its role in the mind/body connection.

After completing the required number of units of didactic work and a comprehensive examination, PhD students will engage in the active research process utilizing the experience, skills and knowledge of their dissertation chair. These esteemed research mentors are recognized faculty of the LLU School of Allied Health & Faculty of Graduate Studies with a wide diversity of research interests and active research studies.

The PhD student's research will take place in one of several specialized laboratories including:

1. Orthopedic Research Studies
2. Neurologic Research Studies
3. Movement/Pain Studies
4. SAHP Metabolic Laboratory

Learning Objectives

PhD Program Graduate will demonstrate:

- Skills to design and conduct novel, original research, provide evidence of an understanding of research designs and the ability to formulate, develop methodologies, collect data, excogitate conclusions, and effectively disseminate research findings;
- Qualities of lifelong learning and commitment to scholarship after graduation;
- The ability to add to the body of knowledge in physical therapy research literature through publications and presentations;
- A commitment to conducting research in lifestyle health and wellness and providing whole-person care.
- The ability to serve as an educator in entry-level, post-professional and graduate level programs
- Personal and group leadership skills at institutional, professional, national, and global levels.

Admission and Entrance Requirements

There are two possible entrance points for students in the PhD in PT program:

- Track 1: Prior Bachelors of Science (BS) in PT plus a master's degree or a Masters in Physical Therapy degree
- Track 2: Prior Doctor of Physical Therapy degree

Admission Requirements:

- Grade Point Average (GPA) Minimum = 3.3/4.0.
- GRE or approved substitution (e.g., structured interview)

International Students:

- TOEFL score of 80 or higher
- Foreign Transcript Evaluation (Educational Credential Evaluators [ECE] or World Education Services [WES])

Program Completion Requirements

The total units required to complete the program will vary depending on the applicant's prior level of education. Students entering the program with a Bachelor's of Science in Physical Therapy (BSPT) and a master's degree or a Master of Physical Therapy Degree (MPT) will be required to complete a minimum 102 quarter units. Students matriculating with a Doctor of Physical Therapy (DPT) degree or a MPT degree plus another doctorate degree will need to complete a minimum of 81 units.
